Fumigation

World class fumigation solutions for quarantine purpose

SSPC provides fumigation service for both import & export shipment for quarantine purpose in Bulk Commodities as per the guidelines of Directorate of Plant, Protection, Quarantine & Storage, Govt of India (NSPM-11, NSPM-12, ISPM-15 -Methyl Bromide & NSPM-22- Aluminium Phosphide).

Fumigation is the process of applying chemical in gaseous state in a gas tight enclosure for sufficient time to kill the quarantine pest present in different commodities likes Pulses, Rice, Maize, Wheat, Spices, Extractions, Oil Seeds, and Timber etc. which is exported to different countries. This treatment is required for elimination of quarantine pest in accordance with the requirement of the importing country.

SSPC provides pre-shipment fumigation of export & import commodity in Bulk Liner, Chartered Vessels, Aircraft, Warehouse Fumigation, Silos etc.

Pest Control Services

GB SERVICE - For Cockroaches & Ants : SSPC provides cost-effective packages for all household, industries, pharmas, hospitalities and more. We focus on rectifying your pest problem by giving high quality service. Our service includes proper inspection, application and monitoring as per the norms of International Food Safety. Our product is odourless gel bait and odourless pesticides.

This service is used for protection against cockroaches & ants.

Service Offer: ♥ Annual Maintenance Contract ♥ Single Service

TERMITE SERVICE : SSPC Provides Pre-Construction and Post-Construction Treatment against subterranean termites (white ants) to prevent damages to structure, wood and construction. Over the years SSPC have improved & expertise itself in this treatment using highly effective and odourless chemicals.

Service Offer:

♥ Pre-Construction - This treatment is carried out in construction stage as per the norms of IS:6313 (Part 2) 10 years service warranty from the commencement date of service.

♥ Post-Construction - This treatment is carried out in ready construction as per the norms of IS:6313 (Part 3) 5 years service warranty from the commencement date of service.

WB SERVICE - For Wood Borer : SSPC Provides WB Service against wood borer to avoid damages to wood. Infection of wood by wood borer is detected by powder falling from tunnels created by wood borer. Severe infection lead to replacement of wood. To avoid infection of wood by wood borer, WB Service is carried out in two ways on infected wood. 1) Chemical Spray on wooden surface. 2) Injection of Chemical inside the wood tunnels.

RATTUS SERVICE : SSPC Provides Rattus Service for Rats & Rodents to prevent damages in Commercial/Industrial area, property damage, disease transmission etc. SSPC uses the techniques which includes inspection of infected areas, highly effective rat baits and eco-friendly glue traps along with our Rattus Box Technology is used. SSPC also uses fumigation technique in rat-holes following Health and Safety Standards.

Service offer: ♥ Annual Maintenance Contract

MOSQUITO SERVICE : The mosquito brings disease and death, creating havoc among unsuspecting victims by spreading malaria, cerebral malaria, brain fever, filariasis and dengue. SSPC has time and again accepted the challenge and succeeded in providing a mosquito-free environment through its scientific and integrated approach. An integral aspect of all operations is the initiative and co-operation of local residents, and our employees through awareness programs. Such mosquito control operations are undertaken in small industrial towns, townships, housing colonies, villages and major cities in different parts of the country.

Pre-Survey & Awareness: • Commercial, Industrial & Pre-Construction Residential Only. • Thorough Inspection of affected site and surrounding areas. • Plan of action will be then determined and explained to customer. • Chemical, Non-Chemical & Biological Adult/Larvae control methods. • Information on preventative measures provided.

Service offer: ♥ Annual Maintenance Contract

FLY SERVICE : The fly is a nuisance to people around the world, primarily in places with a bad sanitary environment. Flies breed in any decaying, rotting organic matter like garbage, filth, excreta, manure etc. This contact subsequently leads to contamination of human food and transmission of disease.

Pre-Survey: • Thorough inspection of site. • This includes breeding site identification, sanitation, chemical, biological and other non-chemical methods.

Service offer: ♥ Annual Maintenance Contract

BED BUGS SERVICE : Spot control treatment of infested areas such as beds, mattresses and furniture. Consultation to customers on prevention of re-infestation.

Service offer: ♥ Single Service ♥ 3 Times Service Contract
